-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Imai.

There is disclosed in Imai an energizing device, comprising: a sheet-like carrier (woven fabric, cloth, plastic, film) 8b; a far infrared ray emitting material A (alumina, lithium oxide, magnesium oxide, calcium oxide, titanium oxide) disposed on the carrier; and an affixing means 8a for disposing the carrier on an article.

In regards to the use of the device on a beverage serving means, such is intended use only and provides no structural limitations to the claims.

It is apparent that the device could be affixed to a beverage container or serving means so as to allow the infrared ray emitting material to affect the beverage within the container.

Claims 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiau et al.

There is disclosed in Shiau a method of aging (energizing) a beverage by providing on the outside of a beverage container a sheet-like carrier (wrapping) which has been coated with far infrared ray emitting material.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Park et al. and Wey are cited for their disclosure of the state of the art.
